
Setting new standards in the international tax and development arena: How to strengthen the voice of partner countries?

Moderation: Irma Mosquera Valderrama

Rapporteur: Frederik Heitmüller

Issues/Challenges

- Reconciliation and coordination of tax policy position within partner countries (Revenue Authority / Ministry of Finance) -> who is capable to speak?
- Processing policy documents and formulating position (challenge for ALL countries)
- Who is speaking for whom among all involved stakeholders?

Best practices/Recommendations

- Making policy documents (of Inclusive Framework etc.) quickly available in different languages (FR, ES, PT). Leave enough time to process them
- Discussing transparently about the **pace** of reform to be adopted by the countries

Take-Aways for the post-2020 ATI

- Regional tax organizations are getting empowered through the international process
- Collaboration: Organize together regional organizations the sharing of insights between countries to make use of data, risk identification, measuring BEPS and other revenue challenges
